

# Capabilities Statement

VETS365 helps with veteran homelessness by offering affordable tiny homes. Our plan is to provide each homeless veteran with a community where we can provide a stable living experience and help them find employment. Working with corporations, the community, and our neighbors we will be able to provide a proven and reliable resource to each Veteran. We are accomplishing this by partnering with local corporations, non-profits, the community, and our neighbors. The solution is a low-income self-sustaining home with a job that enables long-term growth for each individual.

VETS365 provides business-related services to verified disabled veteran business owners. We help disabled veterans register their business for federal, state, and local-municipality contracting. VETS365 also helps veterans start non profit organizations.

## Technical Services

- Offering Education and Mentorship to start your own business
- Registering a new veteran business
- Assisting homeless veterans with Housing Resources
- Addressing the reasons for chronic homelessness
- Offering resume and job assistance

## Mission Statement

Our mission is to connect disabled veterans to quality resources that will help them succeed in their civilian lives, and to provide services that will help disabled veterans realize the dream of business ownership and find permanent housing. We accomplish this through connecting veterans to resources available in their community and by taking veterans through a step-by-step method that will plan and register their businesses. Because VETS365 is directed by veterans and a veteran spouse, we are in a unique position to connect other veterans with resources we have used ourselves. We encourage you to support VETS365 as we serve those who have served us!
